

Chugai Pharmabody Research Pte. Ltd. ("CPR") was established in Singapore as a wholly-owned subsidiary of Chugai Pharmaceutical Co., Ltd (Chugai), a member of Roche group, in January 2012 and started operations on July 2, 2012. Located at Biopolis in **Singapore**, it aims to generate new antibody drugs based on Chugai's proprietary antibody engineering technologies, such as recycling antibody®, sweeping antibody®, bispecific antibody, various Fc engineered antibodies, and other new antibody engineering technologies that are under development.

Position – Researcher in Pharmacology 2 unit

CPR is seeking for a Ph.D. Scientist with expertise in vitro and in vivo pharmacology studies. The candidate will also be responsible for disease target validation and have a strong background in the areas of either immunology and/or inflammation, fibrotic disease biology or chronic disease-related physiology. The candidate will lead antibody drug discovery project and participate in strategic discussions to advance programs through pipeline.

Job Requirements

The applicant should be highly skilled in at least one of the following areas:

- Functional cell-based and cell-free assay development;
- Primary cell isolation and culture techniques;
- Molecular biology techniques such as gene transfection molecular pathway analysis and bioinformatics;
- In vivo pharmacology model establishment.

The applicant must have completed and be awarded with a relevant **Ph.D. degree** in Science or related field (not in the process of achieving it). In addition, the successful candidates must be able to demonstrate their molecular and cellular biology expertise as evidenced by projects, presentations, or peer-reviewed scientific publications.

Scientists with strong passion in medical science for creating and delivering innovative drugs to society which leads to saving patients suffering from unmet medical needs are highly desired. Familiarity or having prior work experience in antibody drug discovery work will be a plus, although not absolutely necessary. You should also possess good command of spoken and written English, excellent organizational and communication skills, team player mindset, as well as the ability to perform multi-task.

Interested applicants are invited to email their detailed resume, as well as their qualifications, availability, current and expected salary to: recruitment@chugai-pharmabody.com
