

# Chugai Pharmabody Research

At the forefront of global research

A subsidiary of Japan's leading pharma company  
Chugai Pharmaceutical

## Unlocking breakthroughs in drug discovery to address global unmet medical needs since 2012

### PROPRIETARY TECHNOLOGIES

Unlike conventional antibodies which has a limited number of targets, our technology in antibody engineering and cyclic peptides allows us to expand the drug target universe to discover novel treatments

### STRATEGIC LOCATION

Located in Biopolis, Singapore's world-class biomedical research hub, we are well positioned to tap on the holistic ecosystem to continuously develop new drug therapies

### EXPERTS IN R&D

Our highly-experienced team of scientists have strong R&D capabilities across the entire spectrum of the drug discovery process

“Every discovery we pursue is driven by one goal: improving patient lives. We focus on developing groundbreaking medicines that unlock new pathways to tackle complex health challenges. By fostering a workplace where our team's work drives meaningful impact and advancing collaborations that accelerate innovation, we contribute to a more vibrant science ecosystem in Singapore.”

Futa Mimoto, Chief Executive Officer  
Chugai Pharmabody Research

#### Location

3 Biopolis Drive  
#07-11 to 16, Synapse  
Singapore 138623
